### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach and/or suggest a fuel supply for a fuel cell having a fuel storage area that is configured to have a fuel outlet that passes fuel from the fuel storage area and has a backpressure regulator designed to maintain a lowered pressure within the fuel storage area relative to atmospheric pressure outside of the fuel storage area when fuel is not being transferred to the fuel cell. The prior art devices have a flexible storage area that collapses as the fuel is expended to the fuel cell device but has no backpressure regulator inside of the storage area, so that as the flexible storage area collapses, there is pressure still pressing on the fuel to push it out of the fuel storage area. Applicants' instant invention has a backpressure regulator inside of the flexible storage area which prevents the flexible storage area from collapsing so that there is no pressure on the remaining fuel inside of the storage area which will cause the fuel to flow out of the storage area container.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce F. Bell whose telephone number is 571-272-1296. The examiner can normally be reached on Monday-Friday 6:30 AM - 3:00 PM.
